

## Jr's Plumbing & Drain COVID-19 Reminders For Technicians

Dear Technicians,

We need to do our part in stopping the spread of the COVID-19 pandemic. That said, field technicians shall remain diligent and continue to take the needed precautions to protect not only themselves but also, family, team members, and customers.

Below is a list to check off daily:

- Wipe off vehicle  door handles and the steering wheel  with EPA-registered disinfectant wipe or disinfectant spray.
- Please sanitize pens and all equipment and/or phones and tablets  with EPA-registered disinfectant wipes or disinfectant spray.
- Please have a new mask and if reused a clean washed cloth mask or disinfected N95 mask.  Surgical disposable masks should not be re-used.
- Please make sure your face shield  is sanitized and clear for your vision. (This shield is only to be used when doing jobs that may have feces like a mlbu or if you might be exposed to exhaust fans).
- Please have your sanitizer and gloves stocked and reach management if you need more.
- Please sanitize hands before going up to a job after exiting your vehicle. Carry the hand sanitizer with you at all times.
- Please make sure to wear gloves  when touching customer's property to avoid bare skin contact.
- Wear gloves to avoid using sanitizer so much and make sure to dispose of gloves immediately after a job. (NEVER USE SAME GLOVES AT DIFFERENT LOCATIONS).

I know this can be tedious but we can get through this and we thank you for keeping up the good work and maintaining a clean work space to lower the spread of this virus. Thank you for all you do.
